

RENDRE LE CIEL ACCESSIBLE

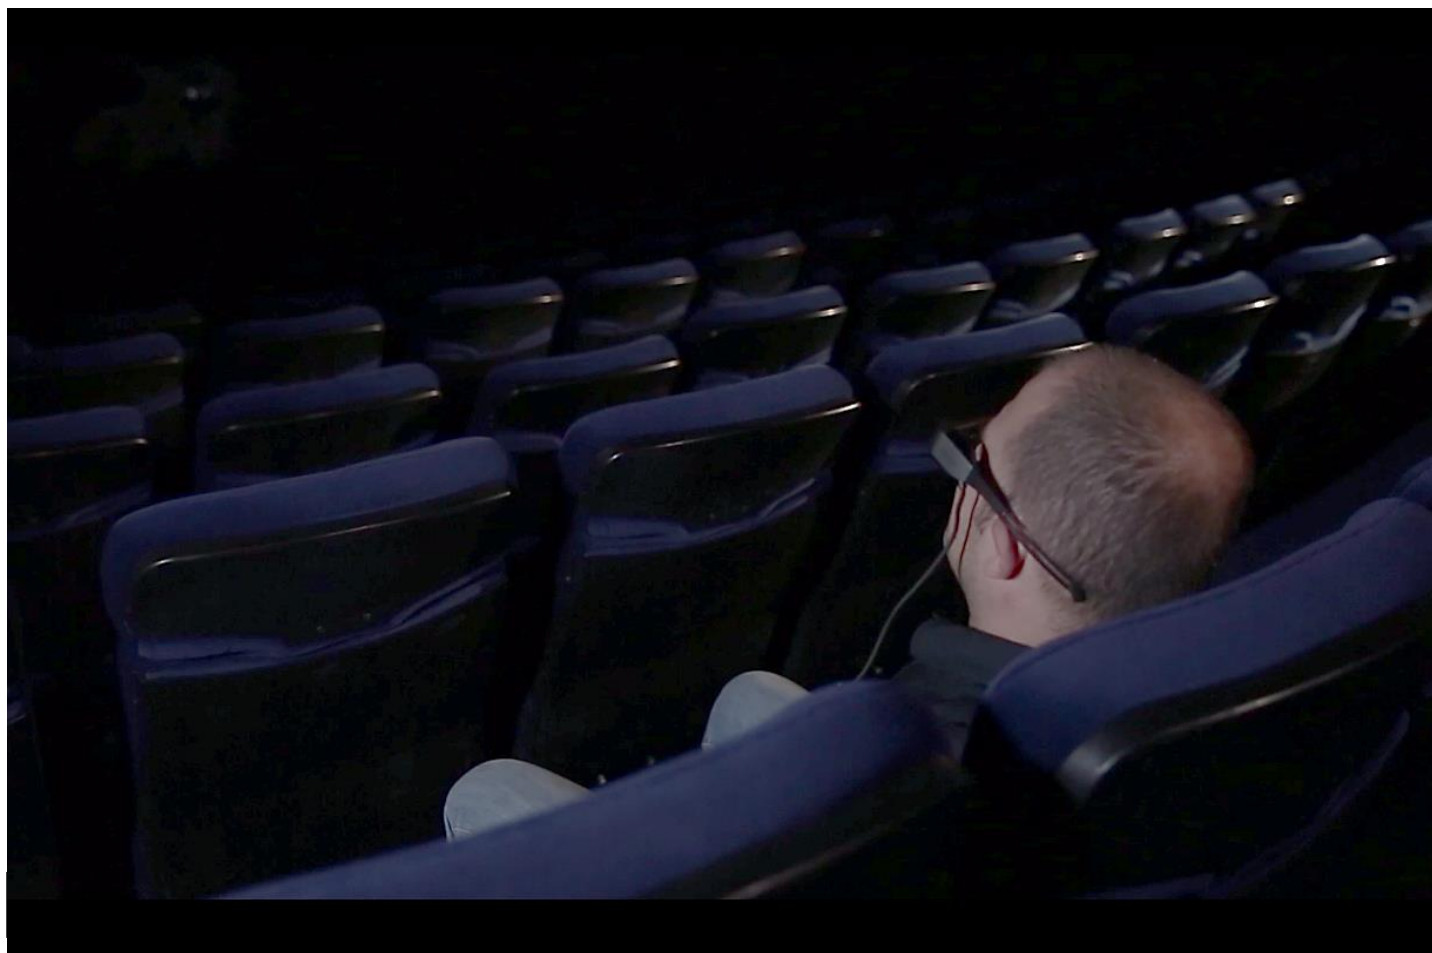

Un planétarium connecté

L'accessibilité à la *Cité des sciences et de l'industrie*

Comment rendre notre planétarium accessible aux personnes sourdes et malentendantes?

Un spectateur augmenté

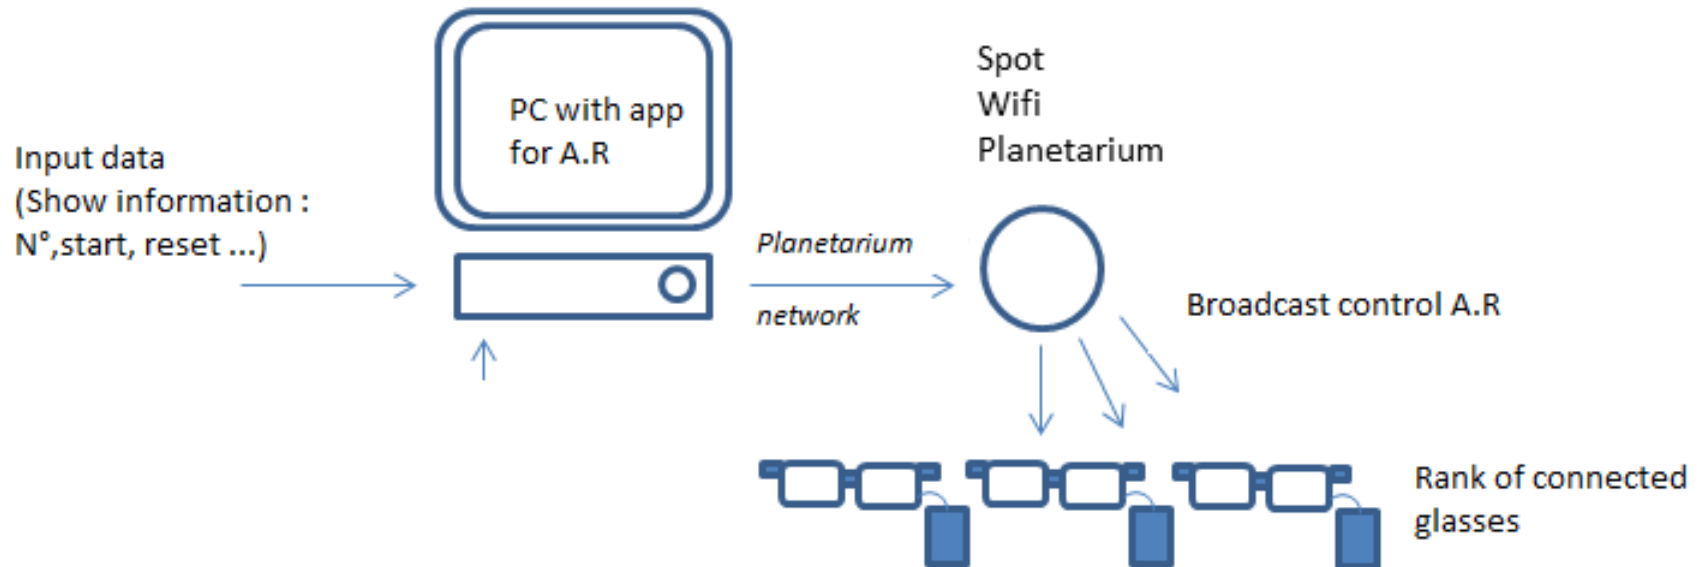

Les lunettes connectées

La LSF visible en réalité augmentée

Comment cela fonctionne?

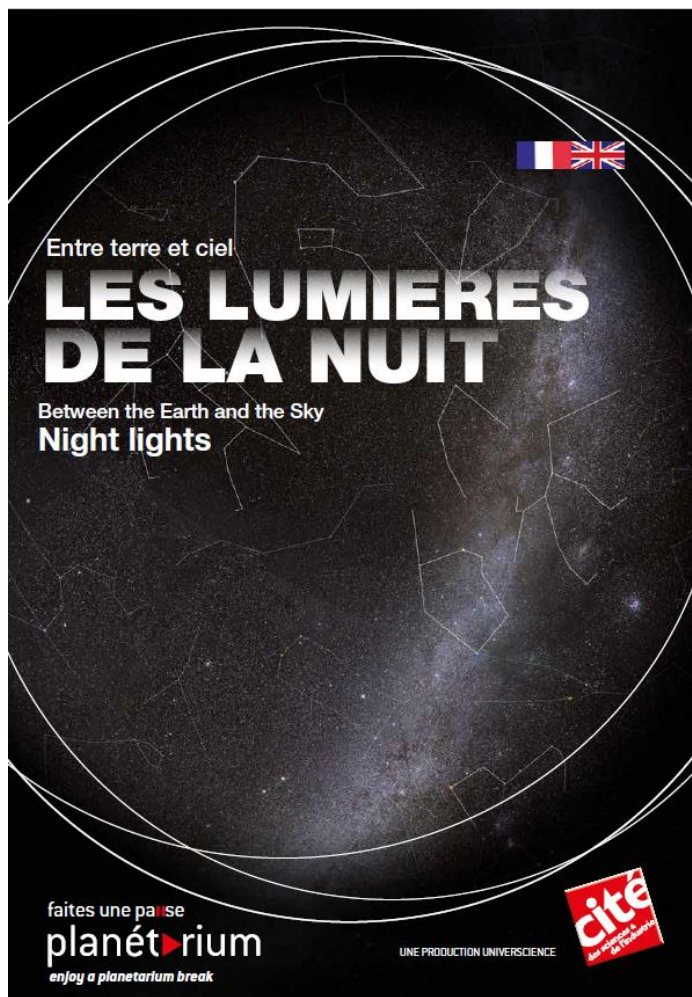

Le software

The screenshot shows the Planetarium-MasterPC software interface. The main window is titled "List" and displays a table of items. The first item is "n°1 : test (lumieres)". To the right of the list, the details for the selected item are shown: "n° : 1", "title : test", and "prefix : lumieres". Below the details are two buttons: "PLAY" (green) and "END" (red). Underneath these buttons is the "Change Timecode" section, which includes "Current TC : 00:00:00,000", "Target TC : 00:00:00,000", and a "GO" button. At the bottom is the "Send Message" section, which includes "Error n° : n°" and a "SEND" button. The interface also features a "Port : 8080" field and a refresh button. The version "Version 1.0" is displayed at the bottom left.

Annotations:

- 1: Points to the top status bar.
- 2: Points to a pencil icon in the top right corner.
- 3: Points to the "List" header.
- 4: Points to the "+" button at the bottom left.
- 5: Points to the "PLAY" button.
- 6: Points to the "END" button.
- 7: Points to the "GO" button.
- 8: Points to the "Error n°" input field.

Le spectacle « Les lumières de la nuit »
