

5G for Museums, Galleries and Heritage - Unlocking the Full Potential

The National Gallery, London

5th March 2020

THE
NATIONAL
GALLERY

Department for
Digital, Culture,
Media & Sport

KING'S
College
LONDON

Welcome & Introduction

Alex Connock

Deputy Chair of the UK5G Creative Industries Working Group
Fellow at Said Business School, Oxford University

Chris Michaels

Director of Digital, Communications and Technology,
The National Gallery

Agenda

- 13:00** Arrivals and registrations
- 13:30** Welcome & Introduction from UK5G and National Gallery
- 13:45** Overview of 5G – presentation by Alex Connock
- 14:00** Discussion panel and Q&A
- 14:45** Refreshment break
- 15:10** Workshop session and feedback
- 16:00** Summary and final remarks by Anna Lowe and Alex Connock
- 16:10** Networking
- 17:15** **Close**

Overview of 5G – presentation by Alex Connock

Alex Connock

5th March 2020

Join us in shaping 5G for the UK at www.UK5G.org

What is UK5G here to do?

- Support the development of the UK5G ecosystem
- Manage information about 5G activities and learning
- Promote the capabilities of UK 5G internationally

UK5G by numbers

2500+	registered users
1100+	organisations
16	projects registered
500+	articles, resources & case studies
~60	events, supported or delivered per annum
1	Advisory Board
6	Working Groups

UK5G magazine two issues – more planned
Fortnightly newsletters & active social media

web www.uk5g.org

twitter [@UK_5G](https://twitter.com/UK_5G)

What is 5G?

Summary of 5G Use Cases

Human to Human

Human to Machine

Machine to Machine

Extreme Mobile Broadband (eMBB)

Virtual Reality/Augmented Reality

Video Calling
Virtual Meetings

Fixed Wireless

UHD Video

Video Monitoring

Mobile Cloud Computing

Enhanced MBB

- 20/10 Gbps DL/UL*
- 4 ms user plane latency
- 500 km/h mobility

Massive Scale Communication (mMTC)

Wearables

Social Networking

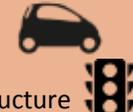

Smart Home / Smart Cities

Health Care Monitoring

Vehicle to Infrastructure

Industrial Automation

Ultra-Reliable Low Latency Service (URLLC)

Public Safety

Remote Surgery

Vehicle to Pedestrian (V2P)

Vehicle to Vehicle (V2V)

Initial 5G Use Cases: demonstrating the possibilities of 5G

5GRIT

Lead: Cybermoor
Field: Consumer, Tourism, Agriculture

5G Rural First

Lead: Cisco
Field: Agriculture, Utilities

AutoAir

Lead: Airspan
Field: Connected Autonomous Vehicles

Liverpool 5G

Lead: Sensor City
Field: Health, Social Care

5G Smart Tourism

Lead: West of England CA
Field: Tourism

Worcestershire 5G Consortium

Lead: Worcestershire LEP
Field: Manufacturing

5G RuralFirst

Connectivity for the UK's rural businesses and communities. Demonstrating technologies, strategies and new business models.

29 Partners and 3 testbed sites in Orkney, Somerset and Shropshire.

5G Cloud Core Network – the world's first deployment of a CUPS based packet core

Dynamic Spectrum Sharing – demonstrating how it can promote competition, encourage investment and provide high speed data transfers throughout the UK

5G Radio Access Technology - enhanced mobile broadband to communities

Agri-tech - wearable technology on cows

Broadcast - the UK's first 700 MHz/3.5 GHz radio network

Industrial IoT - accurate remote monitoring of fish health and water conditions

Community and Infrastructure - high speed connectivity to moving tour buses

Millbrook Proving Ground + 11 organisations

Hyper-dense smallcell network (89 cells deployed over 59 locations)

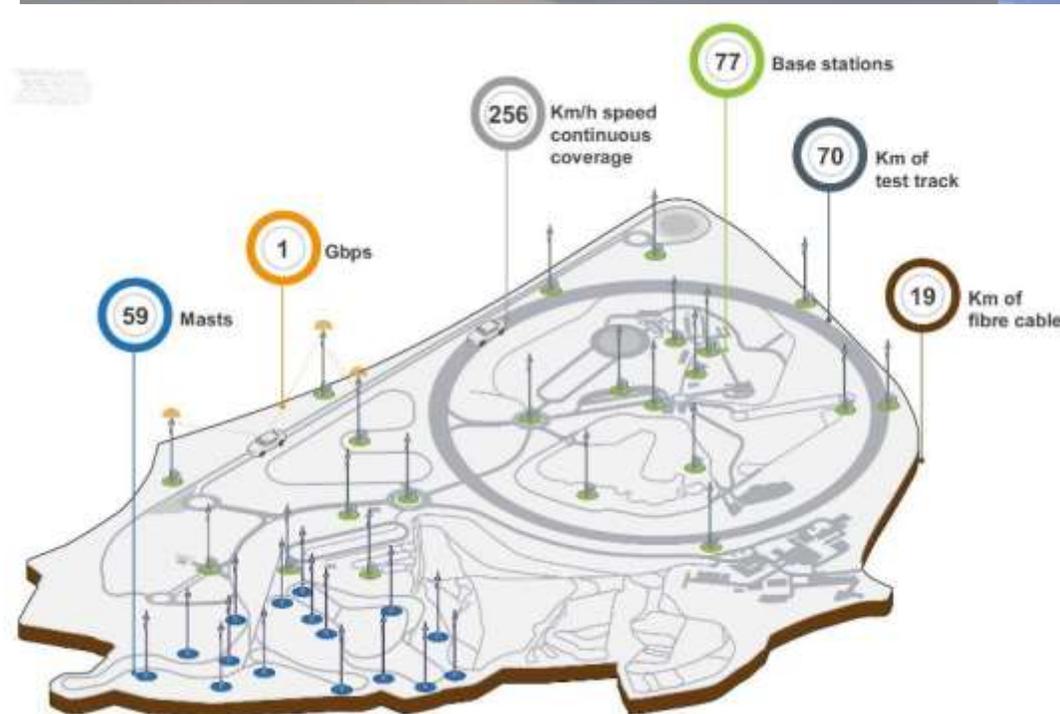

Backhaul using a mix of fibre and mmWave

5G-NR, 5G-Core emergence

Download speed of 1 Gbps @ 160 MPH (250

Applications

- Connected and autonomous vehicles
- Connected trains
- Video heavy lifting: “seeing” traffic ahead, warning of emergencies
- Exploring **neutral host models**: Techno-economics of networks along transport routes

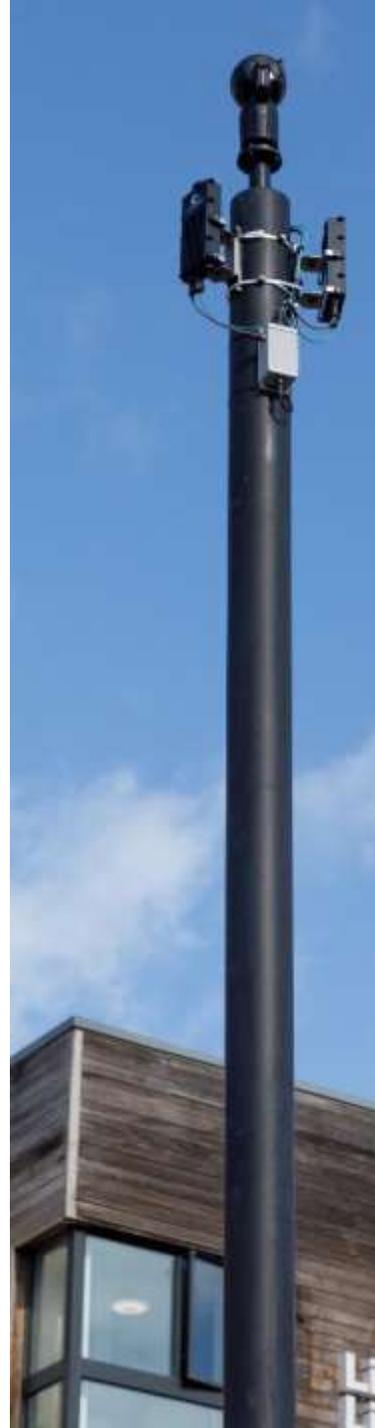

NHS, Universities, Liverpool City Region and businesses

Improving quality of life and reducing costs

80 cells installed on street lamps - guaranteeing coverage & Wi-Fi

Applications

- Assisted living: sensors on chairs, fridges, mains plugs, taps, in beds and doors can detect changes in routine
- Communications: portable, one-way 4K video and two-way audio device - patient to pharmacist
- Loneliness: push to talk wireless calls - connecting patients and carers; tablet-based quiz games

5G Smart Tourism

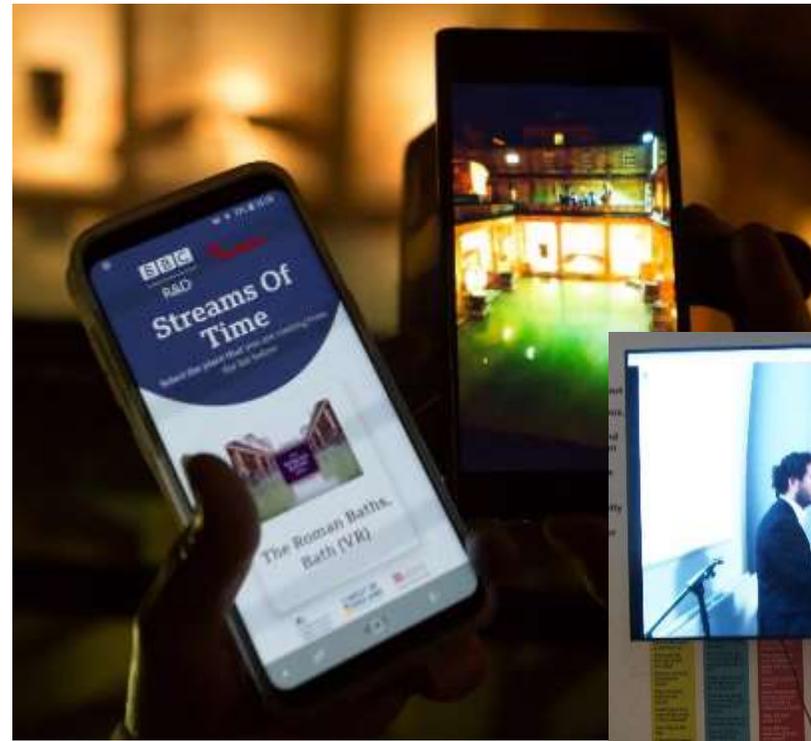

University of Bristol, Local Authorities, Businesses

Bristol City, Bath

- Roman Baths : high resolution augmented reality - geo-located 360° videos on a smartphone with multiple users and low latency. Animations showing different ages of the Roman Baths
- Museum and artwork guides using standard smartphones
- Immersive 360° video for 50 x multiple users simultaneously
- 5G Concert - linking musicians in Bristol and two separate locations in London (Euston Road and the Guildhall) playing together with a latency of under 20ms.

Bristol Smart City applications

- Extensive fibre and wireless systems eg: 2,000 connected street lights
- CCTV safety applications. Thermal Imaging covering Bristol harbour with mmWave installations that allow detections, swift emergency response, and operations centre staff to engage with public through speakers

But what about the rest of media and the arts?

UK
5G

That's why we are here today

Get involved!

You are invited to:

- Register at www.uk5g.org and ask your contacts to register as individuals, organisations and projects
- Upload relevant content using your dashboard
- Send any queries to hello@uk5g.org
- Follow us on LinkedIn and Twitter - just search 'uk5g'

Festival

• MANCHESTER

• INTERNATIONAL

• FESTIVAL

- MIF launched in 2007 as an artist-led festival presenting new works from across the spectrum of performing arts, visual arts and popular culture
- The Festival is staged every two years in Manchester, to live audiences of over 300,000
- The next edition will take place in 2021 at venues all over the city
- In just over a decade, MIF has been pivotal in building Manchester's reputation as a cultural hub, becoming one of the world's most successful and innovative festivals

praxes.
Just like that.

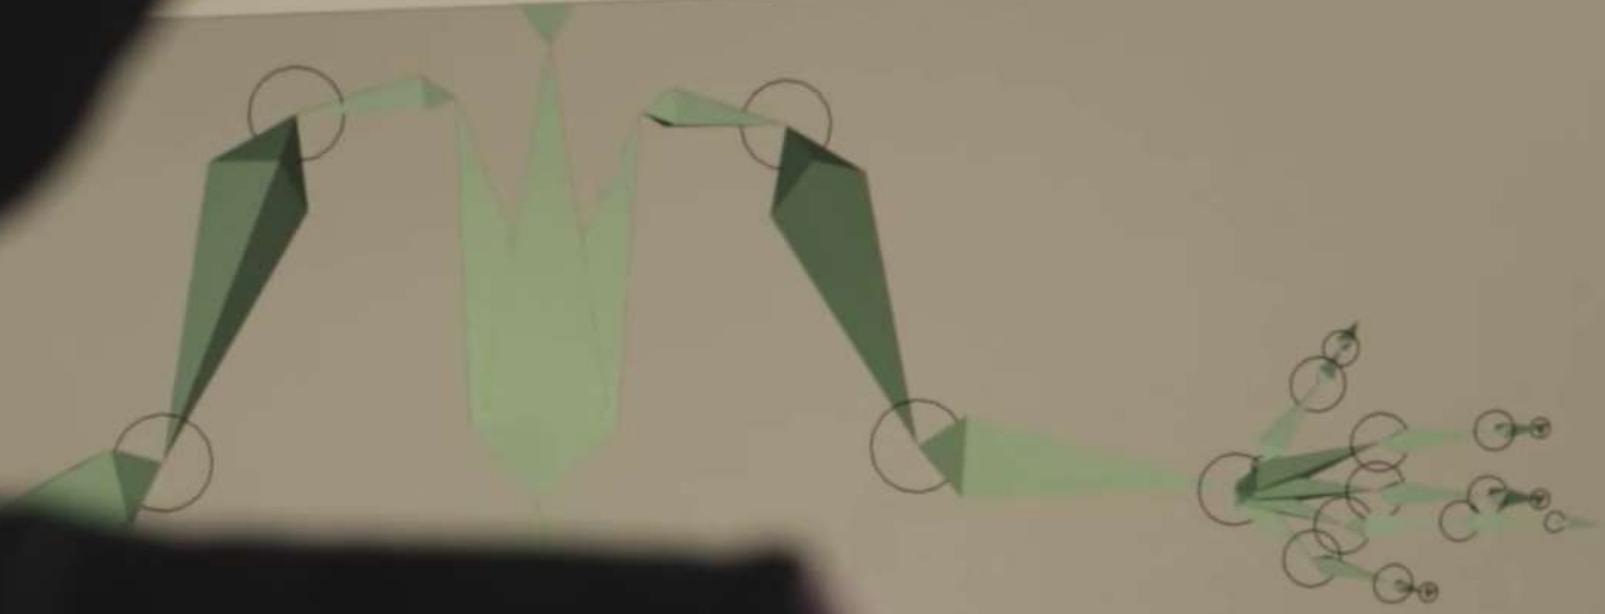

› And gobbets of identity studded my in
Routed entire limbs, whole systems,
Breaking the surface
But properly strip-mined the interior
And contacted, um, phantasmal lud
Through brush contact
Touches, shared paddles and suckers
Molar-pulped white lolly-
-Gagged stick and spatula lickers
And all the lumpy foam and mount-bo
weapons.

“Industry 4.0”

“Human 4.0”

COURTESY ERICSSON/KING'S COLLEGE LONDON

BIZ FRONTIERS

- pioneering the next generation Internet, the Internet of Skills, which is underpinned by 5G and beyond
- will be an enabler for remote skillset delivery and thereby democratize labour globally the same way as the Internet has democratised knowledge
- <http://money.cnn.com/2018/02/05/technology/business/5g-internet-of-skills/index.html>

Vision: Internet of Skills

Courtesy Silver Odyssey's PHuture-Club/Kings College London

- Virtual Reality brings the consumer into another world.
- The immediacy and immersion of 5G enables Synchronized Reality which brings two or more environments together.
- Pioneering concept covered by CNN: www.youtube.com/watch?v=l7Kd4MgKFFU

DJ'ing: Synchronized Reality

Yuja Wang

Reeps One

- **braud.io** is a novel technology for immersive sound recording, synthesis and rendering, developed by Prof Zoran Cvetkovic, et al., King's College London
- It enables unprecedented control over soundscape designs and real time rendition of dynamic scenes, and is currently being “5G-cloudified” to support scalability

5G Spatial Audio (Cloud)

- Redefining the artistic act of painting by using robotics and AI
- Bridging creative arts and innovative tech with Massive Attack artist Rob del Naja
- First results are very promising!

Arts: Future of Painting

A night at the museum
– with 5G

May 23, 2018

< [Twitter](#) [Facebook](#) [LinkedIn](#) [Reddit](#)

100 Networks | #Rostelecom #Ericsson #5G

Rostelecom and Ericsson have launched a 5G trial network at the State Hermitage Museum in St. Petersburg, Russia – one of the largest art museums in the world.

As previously announced, the partners have now deployed a 5G trial zone on the premises of the Hermitage Museum based on Ericsson's latest 5G technology. The project was led by Rostelecom, a leading telecommunications operator in Russia, and Ericsson which supplied a full range of technical solutions and expertise during the implementation and integration phases.

As part of the launch, two new 5G use cases were demonstrated using a mix of virtual reality, haptic technology, and robotics.

In the one case, an object of art was restored with the help of remote-controlled robotic arm. The high bit rate, low-latency characteristics of 5G enable art masters with rare expertise to conduct restoration work with a high degree of accuracy – from anywhere in the world.

In another use case, the partners demonstrated the possibility of 5G for remote learning. As part of this, an art master used a remote-controlled robotic arm to show students precision techniques for restoring works of art. Both demonstrations used 4K video stream transmitted to VR glasses to create an effect of presence for both master and students.

Arts: Remote Restoration

- Guildhall, London –
Brandenburger Tor, Berlin
- World's first distributed concert using ultra-low latency 5G, with an end-to-end delay of 20ms (!)
- Ambition is to make commercial applications with major music brands
- Reported in **The Times**:
[bit.ly/2OG05Vu](https://www.thetimes.com/technology/article/my-5g-distributed-concert-2022-03-10)

My 5G Distributed Concert

Thank you!

National Gallery X

UK5G
March 2020

National Gallery X - the story so far

- An **'infinite studio'** launched in September 2019
- A **partnership** between the Gallery and King's
- A **programme** of residencies, events, research and learning
- An **operational space** with core technology competencies
- A focus for different kinds of **funding**

Residencies - the story so far

Peter Wiegold & and Kier Vine

- Live performance and spatialised audio inspired by Turner's *Rain, Steam and Speed*
- Using immersive sound technologies by Prof. Zoran Cvetkovic
- Performance at launch event
- New showcase event in May (TBD)

Residencies - the story so far

ANALEMA Group

- Immersive light and sound installations based on 6 Gallery paintings
- Working with Gallery and KCL researchers on colour data transformation
- Showcase week 16-22 March

Residencies - the story so far

MIMA School of Art and Design

- Live performance and installation based on history of access, disability and mobility
- R&D week April
- Showcase week June/June

Refreshment break: 25 min - (start again at 15:10)

Workshop and feedback: 30min + 20 min (stop at 16:00)

How can we accelerate 5G adoption?
